California Recruitment Event for Post-Ph.D. Opportunities in Science Policy

at

University of California, Davis

Thursday, November 19th
3:30pm-5:00pm

114 South Hall
(across from Quad, Near Memorial Union)

The California Council on Science and Technology seeks PhD scientists and engineers** to serve as Fellows to provide the California State Legislature with critical, unbiased scientific and technical advice. Modeled on the AAAS Science Policy Fellowships, this program offers a rare opportunity for PhDs to seamlessly enter the world of California policy. Following the one-year program, alums from this program have moved on to an impressive array of policy-oriented, professional positions.

If you’re looking for a professional development opportunity that enables you to incorporate science and technology into public policy, join us for an information session on this exciting program! Current and past fellows will share their experiences and discuss the application process.

For information about this fellowship visit http://fellows.ccst.us.

**A Ph.D. or equivalent level degree OR MS degree in an engineering discipline with at least three years post-degree experience.
